

We SPREAD product knowledge with functional virtual twins of all your product data to drive AI-powered decisions & actions, delivered as SaaS for fast time to value.

Solutions for every phase of the product lifecycle.

- + Navigate product architecture & dependencies
- + Compare / define requirements & design components
- + Detect errors & uncover recurring patterns
- + Bridge knowledge gaps & provide access
- + Gain control over project progress & performance

From today

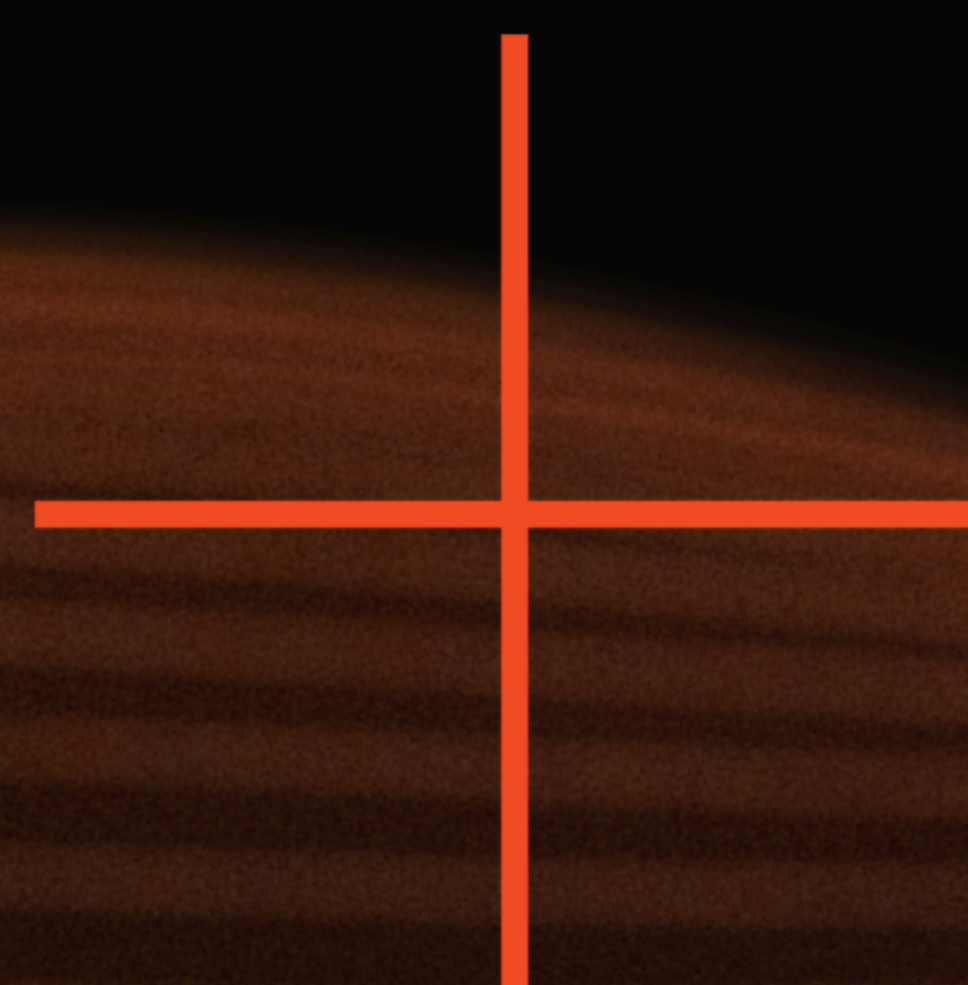

Product data, highly dispersed and siloed

50-70% time spent on data search, yet poor quality

Limited ability to scale AI beyond pilots and drive value

Tomorrow with SPREAD

Rapid Data Ingestion
Hands-on engineering data expertise

Product Twins
AI + SaaS-first open, intuitive & flexible

Action Cloud
Pre-configured Applications & Agents built for Engineering

Engineering intelligence that works for you.

Industries we serve

-  Automotive OEMs & T1s
-  Machinery
-  Defense & Aerospace OEMs
